

THE PANDEMIC OF THE CENTURY

The 'WHEEL OF TIME' keeps moving and with that the pattern of the panorama of the planet keeps transforming like images in a kaleidoscope. The best education is that education which teaches us to keep pace with the changes to remain aligned with time and maintain balance of life lest we are caught off guard and thrown off the balance. Amidst the stormy time of deadly Covid -19 the swiftness and skill with which our teachers and students have adopted the digital technology for imparting education demonstrate our teachers and students rapid adaptive skills. Fostering diverse skills amongst the students is a trait of education which must flourish in school. The Newsletter presented before you contains some of the beads spilled before you illuminating the literary and other finer skills of our students. These beads are peep holes for you to envision the vibrant life and activities of the students in the school.

Don't miss to read the story by Sanskriti Roy "Not In My Wildest Dream" After reading it you will be left amazed with gaped mouth at the flight of imagination and positivity of the child. All write ups like DESH KI EKTA by Bhavya Sahni, CAN PANDEMIC BE INVENTIVE by Samriddhi Sharma, "MANKIND V/S CORONA by Sahil Sen "ADVERSITY BRINGS OUT THE BEST IN MAN" by Disha Mittal, BRAVING THE MIND WAR by Jigeesha Sur "ये ही चाहता हूँ मे" by Adya Tripathi "IN THE LAP OF THE NAYURE" by Pankhil are worth reading. You must visit arts section also. A glance at the 'PAINTERS' GALLERY' will deliver delights to inner depths of your heart.

And at the last a small piece of advise, MAINTAIN PHYSICAL DISTANCE, STAY PROTECTED BUT REMAIN SOCIALLY CONNECTED WITH YOUR NEARS AND DEARS.

GOD BLESS U ALL !!

Raman Raja Khanna

I believe improving education is the biggest lever to improve our world and that the best education is targeted at each student's personal abilities.

By pairing passionate teachers with technology, the potential of every learner is maximized Technology is education for the better and it's happening now.

Our mission is to make world- class, personalized education a reality for everyone here. It gives me immense pleasure to state that our ceaseless and sincere efforts along with IT team has led to the tie up with Google for Virtual Classroom. These classes are helping the teachers to prepare all the learners with new and more engaging ways to succeed.

Vijay Kumar Gulati

At the end of 2019, a new type of coronavirus began making people sick with flu-like symptoms. The illness is called coronavirus disease-19 – COVID-19, in short. The virus spreads easily and has now affected people in many countries.

What are the symptoms of Covid-19?

COVID-19 causes a fever, cough, and trouble breathing. Some people might have:

- 1.a sore throat
- 2.chills
- 3.repeated shaking with chills
- 4.muscle pain
- 5.headache
- 6.a loss of taste or smell

INDIA	CONFIRMED CASES	RECOVERED	DEATHS
	56,342	16,540	1,886

EMBRACING DIGITAL LEARNING IN COVID-19 ERA

India is not new to online education. Many private and government schools had been conducting online classes. Very small aperture terminals (VSATs) are still used by top Business schools in the country to create a closed user group (CUGs), which offers online classes globally. However, COVID-19 has hastened the online education sector, and mobile networks have become the preferred platform.

Amidst the Coronavirus outbreak that has led to a lockdown, several schools and colleges in India have shifted to online education to continue teaching during the quarantine. And while some use apps like Microsoft Teams and Google Meet as virtual classrooms, others say they're ensuring the security of students while using Zoom.

St.Teresa School, Indirapuram, Ghaziabad is following the motto "learning never strictly. Making sure to provide the best facilities possible and engage students maximum level of participation. Students can now attend classes from the comfort of their homes and tap their way into virtual classrooms using a laptop.

VIEW POINT

Student

"Online classes are helpful and interactive as if we're sitting right in the classroom itself.", says Nikita Bajaj (XII-B1)

"I really enjoy and e online classes. I think they are well planned and layed out, easy for me to follow.", says Sanskriti Pandey (IX-B1).

Parent

"Dear St. Teresa School Teachers, Thank you for your hard work in supporting my daughter Ishita Gupta during this difficult era of COVID-19.", says Naresh Gupta.

"Its an excellent initiative by the school to teach children online amidst this turmoil.", comments Rashmi Paliya.

TEACHER SPEAKS

My Learning Curve towards Innovation in Covid era

The Traditional Education System seems to be on a path of total revamp. During these Covid pandemic days teachers are able to explore a completely new realm of technology. Even though these platforms did exist earlier but we were never inclined to use these. Now I find an amazing connection with my students as each student feels he/she is getting an individual attention. The students now are able to devote their time in constructive tasks which otherwise were hard to evoke interest. The pioneer works of various Biologists like Darwin, Watson, and Morgan are read by the students with great interest. It has created an intrinsic interest and curiosity which is supplementing their class attention and performance. Each and every resource used in online teaching such as videos help in the clarity of topics like human physiology. This has also helped my class specifically the underperformers who need extra and individual attention become confident and enjoy a close knit bond with me .

I would strongly support keeping this going in post-covid era as well.

- The students will have full opportunity to fall in love with the subject
- They will be performing their simple experimental activities at home like osmosis, dissection of seeds etc with their real-time observations.
- They can grow plants from seeds and observe their growth pattern, the gap between the appearance of new leaves, measuring the increase in height of the plant periodically to assess their growth pattern and to compare the same with humans..
- At Senior secondary level students can make projects for their practical examinations. Making the project, submitting online and compiling them into a research journal of the school will boost their morale.
- Their hard work will get noticed and appreciated.

Managing Stress & Anxiety During the Pandemic

It's a frightening time, as we all know we're in the midst of a worldwide pandemic. It is also important to know that you're not alone; all of us are sailing in the same boat at this time. Here are some tips to deal with the uncontrollable circumstances, reduce your anxiety and face the unknown with more confidence.

- Keep yourself busy, have a regular schedule
- Distract yourself from negative emotions by listening to music, reading and engrossing in new hobbies.
- Eat, sleep well and drink plenty of fluids. Keep your immune system strong.
- Be physically active, do simple indoor exercises to keep fit.
- Social distancing does not mean social isolation- In times like these when we need one another the most.
- Learn to accept and trust- In the current situation, we have to trust that things will get back to normal, the government and the school authorities are doing their every bit they can to help us. Be positive.
- Focus on the things you can control-. If we're focusing on circumstances outside our personal control, it will get us nowhere, besides feeling overwhelmed.
- Have fun- Take time to do the things that make you smile and laugh.. Find small joys in the situation, like spending more time with your family, picking up a hobby. We need these warm, caring moments right now.
- Take care of Small things , Big things will fall in their place.

Always remember that this too shall pass. It might be stormy now, but rain doesn't last forever. And with positive thoughts and collective efforts, we will get through this as well.

Afreen Sarfaraz
School Counsellor

VISIT TO ICAR

Biology students of class 12 visited Indian Council of Agricultural Research with Ms Neeru Mittal Biology(PGT) and Mr Sanjeev Chaudhary, Chemistry (PGT). The students were able to witness various Irrigation methods, Indoor Cultivation strategies in adverse weather, Soilless culture of plants, Seed testing in seed corporations of India. They also visited the Agriculture Science Museum which was like a cherry on the cake. The students enjoyed an interactive session with the Director of the museum . They watched documentaries, studied informative boards and appreciated exhibits and displays related to the past , present and future of Agriculture. It was an enriching experience for all.

VISIT TO YAMUNA BIODIVERSITY PARK

The school arranged a Visit to Yamuna Biodiversity Park for Biology students of class 11 and 12 along with Ms. Neeru Mittal, Biology (PGT) on 7th Dec,19. It was with an aim to develop a sensitivity and sensibility towards living beings, to appreciate and inculcate love for nature and to supplement the Biology Curriculum This visit left an indelible imprint on the hearts and minds of the students. They explored the whole forest area ,planted with undaunting efforts of Prof.C R Babu .The students also observed various kinds of vegetation with different ecological niches, morphological aspects of flora, habits of Avian Fauna etc.. A large lake in the premises of the park was like an icing on the cake as it made them view the rare presence of Migratory Birds like Large Cormorants..Eurasian Wigeon and rarely visible water snakes basking in the sun. It was an enriching and eye - opening visit for all.

देश की एकता

बचपन में 'पंचतंत्र' की एक कहानी पढ़ी थी - एकता में शक्ति, जिसमें कबूतर अपनी एकता से जाल में फँसे होने के बाद भी जाल को भी अपने साथ उड़ा कर ले जाते हैं। हमारा भारतवर्ष अनेकता में एकता का प्रतीक है। देश की एकता में ही अखंडता है, जो हमें उस लॉक डाउन समय में दिखाई दे रही है। देश एक बहुत ही गंभीर स्थिति से गुजर रहा है। जिसमें प्रत्येक व्यक्ति की जान का खतरा है। यह महामारी ना केवल भारत बल्कि संपूर्ण विश्व में बुरी तरह से फैली हुई है। कुछ अन्य देशों की हालत भारत के वर्तमान परिस्थितियों से बहुत नाजुक है और जिसे देखकर व सुनकर दिल दहल जाता है। ऐसा प्रतीत होता है कि ऐसी स्थिति जीवन काल में प्रथम बार आई होगी।

भारत में संपूर्ण लॉकडाउन की स्थिति है। किसी को भी घर से बाहर निकलने की अनुमति नहीं है क्योंकि यह बीमारी संक्रमित व्यक्ति के संपर्क में आने से फैलती है और ऐसा अनुमान लगाया जा रहा है कि हमें इस अनुभव के साथ लगभग दो-तीन वर्ष गुजराने पड़ेंगे, परंतु इस लॉकडाउन की परिस्थिति में हमारे कुछ योद्धा हमें उस बीमारी से बचाने के लिए दिन-रात कार्य कर रहे हैं, जिसमें हमारे डॉक्टर, नर्सस, हॉस्पिटल स्टाफ, पैरामेडिकल स्टाफ सफाई कर्मचारी व साथ में राज्यों की पुलिस हमारी रक्षा के लिए 24 घंटे तैनात है। हमें खेद है कि ये योद्धा हमें इस महामारी से बचाने का प्रयत्न करते हुए स्वयं भी बीमारी से ग्रस्त हो रहे हैं, परंतु जज्बा है कर्तव्य का कि वे अपनी जान की बाजी लगाकर भी हमारी सुरक्षा कर रहे हैं, परंतु मात्र उन योद्धाओं के भरोसे हमें यह युद्ध नहीं जीत पाएंगे, इसके लिए प्रत्येक नागरिक का फर्ज है कि वह सभी दिशा-निर्देशों को सख्ती से पालन करें। वह स्वयं को व अन्य को सुरक्षित रखकर उन हमारे योद्धाओं की सहायता करें।

Bhavya Sahni

CAN PANDEMIC BE INVENTIVE?

The answer is YES!!!!!!

One of the legendary scientists and philosophers, also known as the 'Father of Physics' Sir Isaac Newton's wonder year is an example of it. Similar to the measures being taken during the current coronavirus pandemic, in early 20s Sir Isaac Newton was sent home from Cambridge when the Great Plague hit London. According to the Washington Post, it was the time, confined in his home, that he made some of his greatest discoveries, including gravity. It was in 1665 during the Great Plague, that Cambridge sent students home for indefinitely long time, as a precautionary measure. Newton returned to his family estate, Wools Thorpe Manor, about 60 miles northwest of Cambridge, where he then thrived. The year 1666, which he spent away from Cambridge at his estate, is termed as Newton's annus mirabilis, his "wonder year" when he began to work on his discoveries in the fields of calculus, motion, optics and gravitation. Quarter of London's population perished in the Great Plague of 1665 and 1666. Newton returned to Cambridge in 1667 and was made a fellow within six months of his return. The current COVID-19 pandemic has affected over 210 countries worldwide, with more than 2,646,424 confirmed cases worldwide and a death toll of over 184,353 according to the World Health Organisation and the numbers are increasing daily.

Newton proved the proverb "Where there's a will there's a way" - if someone is determined to do something, he will find a way to accomplish it regardless of obstacles.

Dear friends, it's time to discover Newton in ourselves. 😊😊

(IX-B6)

MANKIND V/S CORONA

Earlier this year, I read this quote by Leo Buscaglia, "Too often we underestimate the power of a touch, a smile, a kind word, an honest compliment or the smallest act of caring, all of which have the potential to turn a life around", but that time I didn't value it. I didn't understand the true and deep meaning behind this beautiful quote but now it won't be wrong to say that this quote would be found relatable by almost everyone due to the unfortunate and shocking obstacle which has been put in front of not only the global economy but for mankind, as a whole, too.

Today it just seems impossible that there was a time when people were tired of their daily routine and just wanted to stay at home and relax and what seems even more unrealistic, is the fact that it was merely just more than a month ago.

Sahil Sen

ADVERSITY BRINGS OUT THE BEST IN MAN

"God brings men into deep waters, not to drown them but to cleanse them."

Adversity, outwardly may appear ugly and venomous as toad but inwardly it is precious as a jewel and often pays in the long run. Man would not have been able to come out of the forest and step on the moon, if he hadn't faced obstacles and challenges in life. Adversity brings humility and it is the mother of all virtues. It indeed makes a man bolder and wiser. It embeds in them the qualities of forbearance, diffidence and self-dependency. It makes one aware of their real friends and true relationships. It makes a man far-sighted and leads him to trail the path of progress and success. On the other hand, prosperity is the biggest enemy of man. It makes the man lazy and lethargic and a good for nothing fellow. He falls prey to all the vices and fails to get real joy in life. While those who live in prosperity realise the position of others in adverse circumstances. It is important to know that all great men were born and bred in the school of adversity. Mahatma Gandhi, the Father of the nation, might not have attained his full strength had the British not maltreated him in Africa. A.P.J. Abdul Kalam would not have been recognised as the Missile Man had he been nourished in the laps of prosperity. Adversity brings us closer to God. In moments of difficulties, man folds his hands and prays to God. In moments of prosperity he forgets God. The narrowing lust of gold blinds our vision and makes us conscious of material possessions. Thus, it is important to realize that adversity and prosperity are sparts of life and we should not lose hope and always be grateful for life.

Remember -Every dark cloud has a silver lining, the darker the night the nearer is the dawn.

Corona corona corona !!! Oh god ! Today even more cases are witnessed than yesterday. Even after consecutive negative tests, again patients have been tested positive for Covid19. Daily in hope of a single good news regarding this virus , I watch news but unfortunately I end up listening to incline in these cases daily. Only one thing which gives me a little sigh of relief amongst these heart wrenching news is the increasing number of people getting recovered from this virus , the Covid19. And I attribute the spread of this virus to China ! The worst country , who in order to raise it's economy spreads pandemic in the world. And all this was already planned and plotted by China !!

Thinking and pondering this on my terrace in the dim and pink moonlight , suddenly a ray of purple pink glittery light caught my eye. It emerged from the endless sky . As it was too late , 2.45 am around , I thought this might be my illusion out of longing to sleep and stressful thoughts. So I went to my room and slowly slowly.... I fell asleep.

Next morning , again I woke up to the same dreadful news and the whole day passed away with the same lethargic routine amidst this crisis. I was on my terrace wondering again about all this , the cold breeze touching my hair locks made me feel really cool and positive. I wish God could really cause a miracle so that very soon , the world fights and wins against this virus .Maybe I could be a source of this miracle . I want God to choose me for causing the magnificent miracle which could cause the world to smile again ! Suddenly, on my hand I saw purple pink glittery light againnow at the very first moment I was scared. But then as I saw the sky , I noticed that the light emerged from some sort of a spaceship ! Now this time it can't be my illusion. It could be once , not twice. I believe my eyes more than my doubts. I don't know why , but that light's touch made me feel vibrant and positive. That spaceship headed towards me ,down and down. That light started flickering all over my terrace. I stepped back and back. That was all like a dream ! But I knew that it was real and actual . As I was stepping backwards, I didn't realize that I was actually making enough space for it to settle on my terrace. The spaceship wasn't making any sort of sound except a little vibration which I felt as it settled on my terrace. That was the time when conscience told me that "This Is It !! " This is a miracle. I was left doubtless and fearless. The spaceship opened and that pink purple light flashed in my eyes. After adjusting my eyes to the light , I could see an alien like figure standing right in front of me. I knew, my conscience knew that this spaceship had come to the rescue of the world and as I wanted , I am going to be a part of that miracle. The alien's gesture was warm and friendly. He told me that I have to go with them if I want to end the spread of this deadly virus. I was ready . I asked him that by morning I would be back home. He ensured me by nodding . After taking a glance of my sweet family sleeping peacefully . I exhaled a long breath, saw at the vast sky, remembered God and went in the spaceship. The alien too came in ,locked it and we headed up to the sky .

There were two other aliens inside , they told me that they are two hundred years forward from planet earth . They belong to 2200 . Honestly, I was really excited to know that I am really going to their planet and I felt courageous and proud of myself whenever I thought that I'll help the world to smile again soon if everything goes smooth with my alien friends. In my thoughts, I didn't realise that we reached the destination. One by one, we stepped out and I stepped inside their laboratory. There were many, I many other aliens inside the lab. I was provided with a mask and a pair of gloves to wear. I wore it . They told me that they had already made the vaccine cum antidote for Covid 19 many years ago . They came to know about the spread of this virus on planet Earth and were worried about it . They chose me for handling the vaccine cum antidote . I was feeling really vibrant and cheerful by imagining the happiness on earth once I'll reach there. The team of alien scientists handed me the vial with a formula of that. I thanked them from the bottom of my heart and told them that I'll always be there for them if in future they'll need any help from Earth. We exchanged goodbyes and I was ready and super excited to return to earth. I sat in the spaceship which was really cozy. In the space from the glass window I could see from a distance our earth's one side half facing the sun . I knew that was where my India is as I knew that it must be dawn now in India. In that spaceship, I thanked the aliens again and again and by that time I reached the terrace. I stepped down, thanked them, shook hands and we had a sweet goodbye. They stepped in their spaceship , went up to the sky and again, now I saw that ray of purple pink light on my hand in which I had the vial with the formula in the other hand. The spaceship vanished in the sky and on my other hand I could see the light sun rays, making me feel extremely positive and I could foresee the happiness the world will witness. It was 4.30 am now. I went into my room, kept the vial in the refrigerator extremely carefully and the formula in my locker. I was super happy and excited !! The safe ones in their homes will remain safe with the preventive vaccine and with the antidote all Covid19 patients in hospital will become healthy again ! 😊 I had the formula too which would be helpful for the government in making more vials .

Now , at 9 am , I tweeted PMO and WHO. Soon, they called me up, and sent their team to collect that vial and formula from me. On being asked as to how I got this, I told them the reality which was naturally hard for them to believe but amidst the happiness all around by then , the world again waking up to a new morning with happy life again , they believed me. PM Modi and I had a live video chat which telecasted on all news channels.

Now , finally after a few days as per my wishes I woke up to positive and good news and now the whole world is corona-free , all the patients got well by that antidote which was in sufficient quantity due to that formula.

The world now became healthy , happy and positive again and woke up to a healthy and positive morning now !!

BRAVING THE MIND WAR

What comes first to your mind when you hear this word,

"Mental"? Brain, mood swings, insanity? As a student in this really fast yet behemoth world, one really needs to keep sane and protect himself from the arrows thrown by the surroundings that pierce him hard.

As a child, being bullied at school and social circles is atrocious. At a very young age, children gradually lose their self confidence and become apprehensive about meeting new people. And later, it has been revealed that children who have a comparatively weaker character or are introverts share the same condition. Believe me, or not, there are thousands of such children who cannot handle the humiliation and develop mental health issues. The sources can be many, including ragging and bullying as some of the most common sources. For a sensitive mind like that of a teenager, thoughts like, "I am clumsy, I don't look pretty, I am too short, I am dark while my friends are not, I am too fat," and so much more arise, which lead to inferiority complex.

In today's world, it's not just the adults who face stress, but also students. According to WHO, issues like depression, anxiety, and insomnia are common between the children of 14 to 21 years of age groups. Depression is not just a small state or condition, it is an illness that might last a life long. For people who are suffering depression, everyday is like a war. This ocean so deep of grief and despair where one can never find oneself can never be compared.

And surprisingly enough, most of the children "hide" this state from their parents. Even parents suppress the issue stating it to be a normal breakdown. They become apprehensive of contacting a psychiatrist, thinking that maybe consulting a psychiatrist is a symbol of the patient's insanity, and neighbours saying, "their daughter is insane! They are taking her to a psychiatrist." People often end up thinking it will affect their family reputation, and consulting a psychiatrist could cost a fortune for not-so-well-off families.

Dear readers, every mental issue is not insanity! People in this busy world become so lost in following dreams and feeding family, they forget their mental health in the long run. This depression, anxiety, insomnia leads to frustration, failure, and then, insanity. People who can't handle to see themselves going insane commit suicide, sick of living this everyday war.

Yet, to stop this very illness from affecting us further, we must pledge to take care of ourselves and those who need it. When someone is fighting depression, let's not mock him, let's support and love him for being a hero against this great war. When someone needs to be strong, let's not bully him, but make him feel as one of us. Our brain is a tender organ, linked intricately with our heart. Let's take the best care of it we can.

ये ही चाहता हूँ मैं

ये समुद्र की लहरे जैसे बुलाती है
ये पानी की आवाज़ यूँ दिल को छू जाती है
इस खूबसूरत लम्हे में सिर्फ़ मैं हूँ और मेरी तन्हाई

ये लम्हा यही थम जाए यही चाहता हूँ मैं
एक फ़्रेम में जड़ जाए यही चाहता हूँ मैं

ये जो दबी सी आवाज़ है मेरे दिल की
बाहर आए, चिल्लाए, की "आ रहा हूँ मैं"

ये कश्मकश ज़िंदगी की ज़रा तो आराम ले
दो लम्हा कहीं थम जाए यही चाहता हूँ मैं

दूर कहीं उड़ा कर ले जाए मुझे ये हवा,
हर दुख के परे
खुशियाँ बस अपार माँगता हूँ मैं

ये लम्हा यही थम जाए बस यही चाहता हूँ मैं
Adya Tripathi

IN THE LAP OF NATURE...

We are in the lap of nature, It is like our mother
and we can't count it's features

It gives us food, shelter, clothes
and many more things
And also for us a lullaby it sings

But as the time passes
We destroy all of them
Which were earlier for us very precious gems

It has always taken care of us
But we continued to destroy it
And have made our lives a mess

Nature can't speak but it feels
Even then providing us with meals

Stop disrupting natural functioning at all
Because if you don't take care of it today
You won't ever be able to resolve.....

KNOWLEDGE BANK

PLUTO

It is a dwarf planet in the Kuiper belt, a ring of bodies beyond the orbit of Neptune. Pluto was discovered on February 18, 1930. Its status as a planet was questioned following the discovery of several objects of similar size in the Kuiper belt. Jupiter hasn't made a full orbit of the sun since that time because of its too slow orbit. In fact, it takes Pluto 248.09 years to make one orbit around the sun.

FUN WITH RIDDLES

- Q: You find me in December, but not in any other month. What am I?
A: The letter D!
- Q: I weigh nothing, but you can still see me. If you put me in a bucket, I make the bucket lighter. What am I?
A: A hole!

NEWSQUIZ

Over the past four months, we've seen so much. The spread of the new virus; the Australian wildfires, lockdowns, conflicts etc. If you have been following the news, then answering the following will be a cake-walk. Take a deep breath and dive right in:

- Which Iranian military leader was killed by an American Drone Strike?
- How many million acres of land was burned in total in the Australian Wildfires?
- Which country saw a new civil war begin?

- Which airlines was the civilian plane which got shot down by the Iranian military?
- What date was Brexit formally declared?
- What date did the Global Stock Market crash?

- Where was the peace treaty between the US and the Taliban signed?
- Which organisation/body initiated the oil price conflict?
- What was Kobe Bryant's iconic jersey numbers?
- When was the Coronavirus declared a pandemic by the WHO?

Answers: 1- Qasem Soleimani | 2- 46 million acres | 3- Libya | 4- Ukrainian Airlines | 5- 31st January | 6- 12th March | 7- Doha, Qatar | 8- OPEC | 9- 8, 24 | 10- 11th March
